

CRICKWATER

"The Irish heartbeat ... can be found in the stories and sounds of Ireland's music — and the members of South Buffalo's Crikwater know it."

[-Michael Farrell - The Buffalo News](#)

"...encapsulates the modern Irish American experience...their mix of songs is certainly among the best I have heard in recent years and they are almost certainly ready to give the big hitters of the Irish folk scene in America a run for their money."

[-London Celtic Punks Web-Zine](#)

Conceived in a late-night, Guinness-fueled campfire song session, **Crikwater** was born in the rustbelt working-class neighborhood of South Buffalo, NY in 2010, and has grown into the premier Irish-American Traditional Folk Band in Western New York. With numerous festival appearances, including: the Buffalo Irish Festival, South Buffalo Irish Festival, Niagara Celtic Festival, Hornell Irish Festival, Southern Maryland Celtic Fest...and more!...and boasting four multi-instrumentalists and an energetic live show, **Crikwater** stays true to the venerable Irish and American folk traditions, with arrangements that include multi-part vocal harmonies and intricate musicianship, while infusing the music through a contemporary filter making centuries-old music feel fresh and alive! Equally at home in pubs and on festival stages as they are in theaters and listening rooms, these veteran performers offer up a mix of fiery fiddle tunes, rowdy pub sing-a-longs, haunting airs, elegant ballads & original songs, and their music conjures scenes of gritty smoke filled Irish pubs, whiskey, pints of stout, and good craic!

Crikwater have just completed post-production on their third album, "Live in Buffalo," which was recorded by David Pruski of Advanced Audio Productions at numerous venues in Western New York and is set for release in the Spring of 2024... Just in time for the Summer Festival season! With a busy gigging schedule, they eagerly look forward to spreading their Irish folk gospel throughout the land to support the album over the coming year!
